Works

Use UPC/EAN/
Code 39/Code 128
Barcodes

Introducing the easiest way to print barcodes from Sage 50. Save wasted money on storing large label stocks; and simply print as-you-go

Print product labels, warehouse shelf labels, quality assurance or compliance labels.

Print each product one-at-a-time, or print required labels for all new goods received with each purchase order, or despatched sales order (Financial Controller/ Professional only).

Change labels as your needs change. Different labels can be printed for different goods, be personalised or printed small for small items.

Professional looking labels can include text, pictures, lines and all common barcode types.

Printers

Print to dedicated label printer or simple office laser.

Zebra offers an excellent range of thermal label printers, from desktop machines through to high volume industrial printers.

Print Your Own Label Designs

Custom label designs can be created using additional software, either:

- Bartender Enterprise—from Seagull Scientific
- Crystal Reports from Business Objects

Both of these packages offer simple WYSIWYG label design, and a few mouse clicks is all it takes to add bar-codes, graphics, and rich text to create professional labels

Barcode Formats

Default labels provide the four most popular barcode symbologies: Code 39, Code 128, EAN-13 and EAN-8.

Optionally when used in conjunction with Seagull Bartender software to print all other barcode symbologies.

Flexible Label Printing Options

Labels can be printed in two distinct ways:

- Individually selected by product, in order to print one or more labels for specific items.
- If Sage 50 Professional or Sage Line 50 Financial Controller are being used, then the correct labels, and quantities can be automatically generated for specific sales orders, or purchase orders.

Compatibility

Versions available for Sage 50 Professional 2008 and Sage Line 50 Financial Controller 11,12,13 (2007).

Licensing

The software is licensed for connection to a single Sage 50 company database.
