Barcode Scanning

Successful order processing is dependent upon accurate order entry. 'Enhanced Order Entry' provides a number of enhancements to the basic Sales Order Processing (SOP) provided in Sage Line 50 Financial Controller.

Telephone orders can be handled quickly and efficiently due to simple search functionality and product availability. Customer queries can be dealt with in a more professional manner through improved access to customer data. The right product can be quickly identified and mistakes avoided.

It's simple to set-up and quick to learn. Existing users of Sage software will gain immediate familiarity because of the consistent look-and-feel.

Putting you in control

Enhanced Order Entry for Sage Line 50

Enhanced Product Search

Full text search enables products to be easily found. Simple look-up of your Sage product codes from supplier's part numbers.

Barcode Scanning

Simply scan products into Sales Orders using either manufacturer assigned barcodes, or labels printed using Barcode Label Printing for Sage 50

Improved Customer Search

Quickly find customers using all or part of their name, address or postcode.

Product Availability

View product availability without toggling between different Sales Order Processing and Stock screens in Sage. Alternative items can be suggested when a requested item is out of stock.

Hide Obsolete Products

Hide unwanted, outdated or obsolete product codes from the sale.

Customer History

View a customer's previous purchase history and easily access their credit information.

Delivery Charges and Delivery Weight

Control and enforce delivery charges. Display the total order weight to calculate carriage based upon the weight.

User Permissions and Control

Lock down sale prices, discounts, and tax codes so that users are prohibited from making unauthorised discounts. Make the capture of new customer information mandatory.

Compatibility

Versions available for Sage 50 Professional 2008 and Sage Line 50 Financial Controller 11,12,13 (2007)

Licensing

The software is licensed for connection to a single Sage 50 company database.
